TIF Transfers

The City has borrowed money for TIF 2, TIF 3A and TIF 4 projects, and structured the repayment to minimize the interest cost to the City. When the debt was issued, tax collections from the TIFs were expected to be below the desired debt service initially, so plans were to use Capital Improvement Fund (CIF) money to pay the difference, as necessary. Taxes will eventually exceed debt requirements and the CIF will be reimbursed from the TIF revenues, which will occur at different times for each TIF.

Also, and more importantly, each TIF has unique risks that its tax collections will not meet City projections. Because of these two factors, a reserve is made in the budget each year. The City's risks will be better understood or eliminated as tax collections are received each year, so as this occurs, the annual reserve will be reduced and used for other budget needs. Comments about each TIF in this regard are shown below.

TIF 2 - HUNTSVILLE HIGH SCHOOL DEBT	200,000	200,000	200,000	200,000	200,000	200,000	200,000	200,000	200,000	200,000	200,000
--	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------

TIF 2 (HHS) revenue is growing at a modest amount given the mostly-developed nature of the district, so there is low risk of unforeseen circumstances, which the City can respond to well in advance, without making significant Capital Plan adjustments. The reserve amount is generally the amount of the advances made since the advance amount is not available for other needs.

TIF 3A	0	0	0	0	0	0	0	0	0	0	0
---------------	----------	----------	----------	----------	----------	----------	----------	----------	----------	----------	----------

TIF 3A tax collections currently cover debt service, but there is considerable risk associated with significant tax assumptions after 2012, although some may be mitigated with development in the large district that was not projected when the TIF was established. Nonetheless, it is necessary to build a reserve until the tax assumptions in 2012 and beyond can be proven.

TIF 4	500,000	500,000	500,000	(250,000)	(250,000)	(250,000)	(500,000)	(500,000)	(500,000)	(500,000)	(500,000)
--------------	----------------	----------------	----------------	------------------	------------------	------------------	------------------	------------------	------------------	------------------	------------------

TIF 4 has growing tax collections, and the taxes are estimated to exceed debt service in 2016. There is moderate risk of projection error since some significant tax assumptions were made. The annual reserve covers debt service advances and projection risk.
